CENTRAL ARIZONA

Answer to Many Inquiries Relative to this part of Arizona. Climate, Soil, and Productions

This portion of Arizona is a vast plateau, varying in altitude from 5,000 to 7,000 feet above the sea, with here and there a peak rising to an heighth of from 9,000 to 13,000 feet. These higher elevations, situated with remarkable regularity broughout the central portion of Yavapai county, are a local and conblankets of snow that cover them during six to eight months of the year. During the open period of the winter months and in early spring great bodies of water flow from these vast snow beds, to be swallowed up at last by the insatiable sands of the distant

The water supply is limited, and rigid economy will be required in the future. The scarcity of water in Arizona is at present a safeguard against and the queenly Vekol on the south the country being overrun by cattlemen who are being crowded out of other localities.

The annual rain-fall begins in the month of June and lasts until Sepember. It comes in gentle showers and with admirable regularity, stimulating a wonderful growth in a remurkable short period of time. Wheat, rye, oats, barley and millet are grown without irrigation, yielding an adundant and profitable crop. Corn is successfully grown in the valleys and basins below an altitude of 6,000 feet. All kinds of root vegetables flourish Josh Billing's will shows an estate and grow to enormous size and are of excellent quality, commanding a price in the "home market" that to an Eastermor Northwestern farmer would seem fabulous. Although 10,000 pounds of potatoes per acre is but an average yield, such is the local demand from our adjacent mining camps, saw miils and railway towns, it has never been supplied by the home production. Cultivaoynd the preparation of the soil, planting and gathering, is bestowed up in the crop. The entire country is singularly free from

> the bane of the Eastern husbandman. There is a growing demand for hay, and many ranch men flad it more profitable to utilize their growing crops for that purpose by cutting and uring it before the grain is fully matured All that portion of the great placeau above 6,000 feet is covered with magnificant forests of pine, with intervening glades of mountain parks and praries, Grazing is the leading

industry of the northern portion of Yavapa of Bowie, after a long legal flight for county. Rigid economy in the hoarding and use of the present water supply meets the Half Soleing, Pegged, \$1.25; Sewed, present demand and is the safeguard against our ranges being overrun by herds from the crowded ranges of other localities It is esentially a country for the poor man or the stock grower beginning life with moderate means. The springs and tanks affording permanent water he miles apart, giving a

supply in each place sufficient for a small band of from 100 to 500 head of stock. Around these water supplies lie hundreds of R. G. Fiint, who recently died at square miles of nutritious mountain grasses, San Luis Obispo county, California, any ten acres of which is capable of keeping one animal throughout the year. By the construction of the artificial basins and dices be A man named T. M. Rumsey was fore referred to, water may be saved and utilthis section command advanced prices in the markets of the adjacent cities. Our animals

The Atiantic & Pacific railway runs centrally through this section east and west, and the company own alternate sections of land. They offer special inducements to capitalists unearthed at Brooklyn only a few do not in this section dispose of quantities inches under ground and closely less than 50,000 acres. The remaining lands are subject to homestead and preemption rights. The past two years show a perceptible increase in the filings and settlements of

wide and in length extends beyond the limits Newsboys have been arrested for of the Territory referred to in this article. As a whole it is larger than the State of Maryland, and an agreeable revelation to the traveler who, in keeping with the popular belief our eastern neig bors, imagines in cross ing Arizona he is about to traverse a barre and sandy waste.

The lumber product of the one great say mill in all these pineries finds a ready market in Old Mexico, Southern California and New Mexico, with increasing local de-The railway towns and principal mand. since in New York, in speaking of markets of this section are Holorook, Winslow, Flaustaff, Williams and Ash Fork, The relative ments of these towns need not here be discussed, being about equal in importance and each peopled with energetic, hospitable and progressive citizens. ols, churches and social amusement

prevail. The interest manifested in all matters pertaining to social progress is perhaps greater than in eastern towns of like numbers Aside from pulmonary complaints among those not acclimated, there is no sickness. Fevers and all forms of malarial diseases are unkn wn. Arizona's least need is doctors The southern and central portion of Yava pai county is rich in mineral-bearing ledges and placer gold fields. Recent discoveries in Cataract gorge, north of the Bill Williams mountain, bid fair to rival in some respects some of our older camps. During the sum-mer season persons visiting the Cataract regions may procure "outlits" and find the place accessible from either Ash Fors, Williams or Flagstaff. The lack of proper machinery to treat the ores of this section is at ties interested must call and arrange present the greatest draw back to mining interests. No mining country of like area of cattle, will be sold very low. Owner gocan show such uniform value in all ore products as this portion of the territory and the amount of ores now being shipped to distant works for treatment should be substantial proof that reduction works capable of treating the refractory ores of our mineral bearing ocalities would be a profitable investment for its founders. There are no hostile Indiana in this p rtion of Arizona.

The land is strewn with the ruined habitations and relics of prehistoric races. High on the walls of each mountain gorge and canon may be found the ruined pueblos of the cliff dwellers, from the single hat to vast cities widely scattered throughout the land. On the mesas and plains we find ruins of like antiquity. Here is a vast pyramid and pile, with an occasional wall that has withstood the wearing of the elements, standing yet to a heighth of two or three stories to give us some conception of the workmanship and architecture of this departed people.

There yet remains hundreds and thousands of square miles of virgin country, practically unexplored, with resources untouched and abilities unknown.

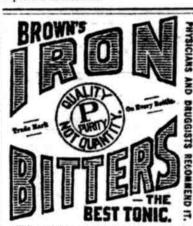

Heer, antelope, bear and mild turkey are to be found in great numbers, with Oak Creek southwest of Flagstaif literally fourteen mi swarming with mountain trout.

The climate is mit I, temperate and regular to a wonderful degree, and the county singu
